VAPT & Ethical Hacking Program

Industry-Oriented | Hands-on Labs | Career-Focused

🚀 Become a **Certified VAPT & Ethical Hacking Professional** with **real-time labs, tools, and enterprise-level attack simulations**.

📌 Program Highlights

- ✅ 100% Practical Lab-Based Training
- ✅ Real-Time Vulnerability Assessment & Penetration Testing
- ✅ Live Kali Linux & Windows AD Labs
- ✅ Web, Network, Cloud, Mobile & Wireless Security
- ✅ Professional Pentest Report Writing
- ✅ Capstone Project + Interview Preparation
- ✅ Suitable for **Freshers & IT Professionals**

AimNxt School of Tech Leaders

🗓️ Program Duration

4 Months | 80 Days | Day-Wise Practical Schedule

Course Modules

🖧 Module 1: Networking Fundamentals & Lab Setup

(Week 1)

- 🔹 OSI Model & TCP/IP
- 🔹 IP Addressing & Subnetting
- 🔹 Network Protocols (TCP, DNS, ARP)
- 🔹 Port Scanning & Network Mapping

🧪 **Labs:**

- Kali Linux, Windows & Metasploitable Setup
- Wireshark Traffic Analysis
- Nmap, Netcat, Hping3 Hands-on

🐧 **Module 2: Linux for Hackers**

(Week 2)

- 🔹 Linux Command Line Mastery
- 🔹 Permissions, Users & Groups
- 🔹 Bash Scripting for Automation
- 🔹 Linux Privilege Escalation

🧪 **Labs:**

- 50+ Linux Commands Practice
- Custom Bash Scripts
- Real Privilege Escalation Attacks

🪟 **Module 3: Windows Internals & Active Directory**

(Week 3)

- 🔹 Windows Architecture & Internals
- 🔹 PowerShell for Pentesting
- 🔹 Active Directory Setup
- 🔹 Credential Attacks & Privesc

🧪 **Labs:**

- Mimikatz & Hashcat

- Domain Controller Setup
- Windows Privilege Escalation

🌐 **Module 4: Web Technologies & OWASP Top 10**

(Week 4)

- 🔹 HTTP/HTTPS Deep Dive
- 🔹 Web App Architecture
- 🔹 Client-Side & Server-Side Technologies
- 🔹 OWASP Top 10 Vulnerabilities

🧪 **Labs:**

- Burp Suite Interception
- DVWA & bWAPP Labs
- OWASP Vulnerability Mapping

AimNxt School of Tech Leaders

🔍 **Module 5: Information Gathering & Reconnaissance**

(Week 5)

- 🔹 Passive & Active Recon
- 🔹 DNS & Subdomain Enumeration
- 🔹 Web Recon Techniques

🧪 **Labs:**

- theHarvester, Maltego
- Amass, Sublist3r
- Gobuster, FFUF

🛡️ Module 6: Vulnerability Assessment & Scanning

(Week 6)

- 🔹 VA Methodology & CVSS
- 🔹 Automated vs Manual Testing
- 🔹 Web Vulnerability Scanning

🧪 **Labs:**

- Nessus & OpenVAS
- OWASP ZAP, Nikto, WPScan
- Manual Vulnerability Verification

💉 Module 7: Web Security – Injection Attacks

(Week 7)

- 🔹 SQL Injection (Basic → Advanced)
- 🔹 Command Injection
- 🔹 XXE & Template Injection

🧪 **Labs:**

- SQLMap Automation
- Reverse Shell Attacks
- Real RCE Scenarios

🔐 Module 8: Authentication & Authorization Attacks

(Week 8)

- 🔹 Broken Authentication
- 🔹 Session Hijacking & JWT Attacks

- Password Cracking
- IDOR & Privilege Escalation

🧪 **Labs:**

- Hashcat & John
- MFA Bypass Techniques

🧠 **Module 9: Client-Side & Business Logic Attacks**

(Week 9)

- XSS (All Types)
- CSRF & CORS
- Business Logic Flaws

🧪 **Labs:**

- Blind & Advanced XSS
- Race Conditions
- Price Manipulation Attacks

⚙️ **Module 10: Network Exploitation & Post-Exploitation**

(Week 10)

- Metasploit Framework
- Network Service Exploitation
- Lateral Movement & Pivoting

🧪 **Labs:**

- SMB, FTP, RDP Exploits
- Persistence Techniques

🏢 Module 11: Active Directory Attacks

(Week 11)

- 🔹 AD Enumeration
- 🔹 Kerberos Attacks
- 🔹 NTLM Relay
- 🔹 Domain Persistence

🧪 **Labs:**

- BloodHound
- Golden & Silver Tickets

📡 Module 12: Wireless, IoT & Bluetooth Security

(Week 12)

- 🔹 WiFi Attacks
- 🔹 Bluetooth & RFID
- 🔹 IoT Security

🧪 **Labs:**

- WPA2 Handshake Cracking
- Wireless Recon

📱 Module 13: Mobile Application Security

(Week 13)

- 🔹 Android App Pentesting
- 🔹 API Security
- 🔹 iOS Security (Basics)

🧪 **Labs:**

- APK Decompilation
- SSL Pinning Bypass
- API Attacks

☁️ **Module 14: Cloud & API Security**

(Week 14)

- AWS & Azure Security
- REST & GraphQL API Testing

🧪 **Labs:**

- S3 Bucket Exploitation
- IAM Misconfigurations

AimNxt School of Tech Leaders

📝 **Module 15: Report Writing & Professional Skills**

(Week 15)

- Pentest Report Writing
- Executive Summaries
- Remediation Planning
- Portfolio & LinkedIn Branding

🎯 **Module 16: Capstone Project**

(Week 16)

- End-to-End Pentest
- Exploitation & Reporting

- Client Presentation
- Mock Interviews

Career Outcomes

✓ VAPT Analyst
✓ Ethical Hacker
✓ SOC Analyst
✓ Security Consultant
✓ Bug Bounty Hunter
