★★★★★

I recently joined Aimnxt for the Data Analyst course, I'm happy with my decision. The teaching quality is excellent. If there are any complex concepts they breakdown it and make us easy to understand every topic. We can freely ask any kind of doubts about the topic. And also staff is friendly and supportive, always ready to assist us. I'm sure it's a great place to learn and grow.

Course Curriculum

Module 1 – Introduction To DevOps On Cloud

1. Understanding DevOps and its lifecycle
2. Why DevOps on Cloud?
3. Introduction to AWS
4. DevOps using AWS
5. Security Management – IAM (Identity and Access Management),WAF (Web Application Firewall), AWS Shield, Guard Duty
6. Trusted Advisor
7. Governance Strategies

Module 2 – SDLC Automation

1. Code Commit
2. Code Build
3. Code Pipeline
4. Code Deploy
5. AWS Code Star

Module 3 – Automating Infrastructure With CloudFormation

1. Introduction to CloudFormation
2. CloudFormation Template
3. Stack Creation
4. Advanced CloudFormation Concepts – CloudFormation Nesting, CloudFormation Wait Conditions & Wait Condition Handlers, CloudFormationHelper Scripts, CloudFormation Custom Resources
5. CloudFormation Stack Updates
6. CloudFormation Resource Deletion Policy
7. CloudFormation Best Practices
8. Troubleshooting

Module 4 – Application Deployment Using Elastic Beanstalk

1. Introduction to Elastic Beanstalk

2. Components of Beanstalk
3. Deployment Option
4. Platform Updates
5. Docker in Elastic Beanstalk
6. Extending Beanstalk using extensions
7. Alarms and Notification
8. Troubleshooting

Module 5 – Configuration Management Using OpsWorks

1. Introduction to OpsWorks
2. Components of OpsWorks
3. Cookbooks, Recipes, Data bags and Berkshelf
4. OpsWorks Lifecycle Events
5. OpsWorks Deployment
6. OpsWorks Auto-Healing
7. Troubleshooting

Module 6 – Automate Monitoring And Event Management In AWS

1. Introduction to CloudWatch
2. CloudWatch Metrics: EC2, ELB, and Auto Scaling metrics
3. Custom Metrics
4. CloudWatch Alarms
5. CloudWatch Agent
6. CloudWatch Logs
7. Introduction to CloudTrail
8. System Manager
9. Tagging
10. Concepts required to set-up event-driven automated actions -Lambda, SNS, Autoscaling

Module 7 – High Availability, Fault Tolerance And Disaster Recovery

1. EBS
2. Elastic IP
3. Multi region and multi AZs

4. SQS
5. Data Management in Amazon RDS
6. Dynamo DB
7. S3
8. Provisioning elasticity using Load Balancer and Auto-Scaling
9. Components of Auto Scaling
10. Horizontal and vertical scaling
11. Auto-Scaling Lifecycle
12. Recovery Time Objective and Recovery Point Objective
13. Disaster Recovery Options
14. Overcome single Point of Failure

Module 8 – Container Management Tools

1. Orchestration
2. Elastic Container Service
3. Amazon ECR
4. Select a Launch type for your application
5. ECS with EC2
6. ECS with Fargate

Module 9 – AWS Certified DevOps Engineer Exam Discussion (Self-paced)

1. AWS Certified DevOps Engineer Exam Guide
2. Certification Exam Questionnaires

Module 10- Linux Over View /Basics

1.Over View and Life Cycle
2.Basics/General Commands
3.Daily Usages Commands

- Cron Jobs
- Logs Creation
- Backup
- Monitoring etc

Module 11- Shell Scripting

Module 12- Tomcat/Nginx (1/2-Class)

Module 13- Httpd/ Maven (2-Classes)

Module 14- Elastic Load Balancer (1/2 Classes)

Module 15 -Git/ Git hub (2-classes)

- Installation of Git
- Git Command Overview
- Interacting ith git Hub
- Git Clone from Hub

Module 16 - Bit-Bucket (1-Classes)

Module 17-Docker (2/3-Classes)

- Docker Over View
- Docker Installation (Windows/ Linux/Ubuntu/Windows)
- Docker Commands cretaion of Containers
- Docker File
- Docker Hub

Module 18-ssh Authentication with single and Multi users (1-Class)

Module 19-Ansible (3/4Classes)

- Installation
- Ansible Adhoc Commands
- Ansible Playbooks
- Ansible tags
- Ansible Logs
- Ansible Roles
- Ansible Galaxy

Module 20- SonarQube (1-Class)

Module 21- Jenkins (3-Classes)

- Basic requirement of Jenkins
- sample Jobs and Free Jobs

- Triggers
- Manage Jenkins– Creating Nodes
- Installations (Windows/Ubuntu/Linux)

Module 22- AWS Code Pipeline

Module 22-Kubernetes (4/5-Classes)

- Overview
- Installations (Linux/Ubuntu/Windows)
- K8 and Admin
- minikube
- EKS (Manual Creation)
- Creating pods
- Node Control
- Namespaces
- Kubernetes Cluster
- Kube Networking
- Kube Node attachment

Module 23- Terraform (4/5-Classes)

- Basics
- Installation (Windows/ Ubuntu/ Linux)
- VPC and Ec2 Creation
- modules
- State
